

“New Perspectives on TMD: A Diagnostic Challenge”.

Jeffrey P. Okeson, DMD
Professor and Dean, Provost’s Distinguished Service Professorship
Founder, Orofacial Pain Program, University of Kentucky College of Dentistry
Lexington, KY

Outline:

There are many concepts in dentistry associated with temporomandibular disorders. Some of these concepts are supported by sound data and many are not. This presentation will highlight some of the facts and fantasies related to the etiology of TMD. The diagnostic challenges of TMD will also be discussed.

What you will learn:

Understand the hallmarks of TMD pains and how you can quickly separate TMD from other orofacial pains.
Appreciate how evidence-based dentistry has changed our approach to understanding and managing TMD.

Objectives:

- Describe five potential risk factors for TMD.
- Identify how dental therapy may influence TMD.
- Describe the relationship of bruxism to TMD.
- Explain the importance of taking an accurate history for the TMD patient.

JEFFREY P. OKESON, DMD

Professor and Dean, Provost’s Distinguished Service Professorship
Founder, Orofacial Pain Program, University of Kentucky College of Dentistry
Lexington, KY

Dr. Okeson is Professor and Dean of the University of Kentucky College of Dentistry. He founded in the College’s Orofacial Pain Program in 1977. Dr. Okeson has more than 240 publications in the area of occlusion, TM disorders and orofacial pain in various national and international journals. He has also written two major textbooks translated into twelve foreign languages and widely used throughout the world. Dr. Okeson is an active member of many TMD and orofacial pain organizations holding many offices and serving on numerous committees and boards. He is a very sought after lecturer on the subject of TMD and orofacial pain and has presented more than 1300 invited lectures on the subject of TMD and orofacial pain in all 50 states and in 59 different countries. He has received numerous teaching awards including “The International Dentist of the Year Award” from the Academy of Dentistry International. This is the highest award recognized by this Academy and was given to him in recognition of his worldwide efforts in providing education in the area of temporomandibular disorders and orofacial pain.
